PATENT
Filed: April 23, 2001

16. (currently amended) A method of interactive television, comprising the acts of:
displaying a gateway screen in response to a user turning the television on; and
enabling a consumer to receive information from at least two of: at least one Web
server, at least one interactive television system server, and at least one television signal
source via the gateway screen, wherein the gateway screen is displayed in response to
receiving a signal to deenergize the interactive television.

17. (original) The method of Claim 16, wherein the gateway screen includes at least one television
content panel and at least one Internet content panel.

18. (original) The method of Claim 16, wherein the gateway screen is displayed when the
interactive television is turned on.

19. (canceled).

20. (original) The method of Claim 16, wherein the gateway screen is displayed when a gateway
screen button is toggled.

21. (original) The method of Claim 17, wherein the television content panel includes content from
the at least one television signal source.

22. (original) The method of Claim 17, wherein the internet content panel includes content from
the at least one Web server.

23. (original) The method of Claim 16, further comprising the acts of:
receiving consumer input via a conventional TV control device; and
establishing the gateway screen based at least in part on the consumer input.
